### Editor's Note

In this issue of the Newsletter we have departed somewhat from our usual type of article to present to labor educators and librarians who serve labor an extensive bibliography on a subject of great importance. Because this is in the nature of an experiment we would like our readers to let us know if such bibliographies serve their needs. Please send us your comments on the usefulness of the bibliographies, any changes you would like to see in the format, and those subjects that you would like developed into special bibliographies. Address all comments to Bernard F. Downey, Editor, Library Service To Labor Newsletter, Institute of Management and Labor Relations, Rutgers - The State University, New Brunswick, New Jersey.
